Viral Vector Manufacturing Facility (VVMF) at BIO KOREA 2025

Viral Vector Manufacturing Facility Pty Ltd (VVMF) is set to participate in BIO KOREA 2025, May 7-9 2025, bringing its expertise in viral vector manufacturing to one of Asia's premier biotechnology conventions.

Representing VVMF at this event, Anita van der Meer, Head of Business Development and Partnerships, will be available at the Australian Pavilion for meetings and discussions.

"We are excited to engage with global industry professionals at BIO KOREA 2025 and share VVMF's advanced capabilities in recombinant lentiviral (rLV) and recombinant adeno-associated viral (rAAV) vector process development and manufacturing" said Anita van der Meer.

VVMF is committed to supporting biotech and pharmaceutical companies by providing high-quality viral vector solutions tailored to their research, clinical, and commercial needs. With access to leading scientific and clinical expertise, VVMF offers a strategic advantage, further strengthened by Australia's 43.5% R&D tax incentive for eligible companies.

Schedule a meeting through the one-on-one partnering platform on the BIO KOREA website or contact us at info@vvmf.com.au to explore how VVMF can be your trusted partner in advancing cell and gene therapies.

Unlocking the future of medicine – with you at BIO KOREA.

About VVMF – Unlocking the Future of Medicine

Viral Vector Manufacturing Facility (VVMF) is an Australian Contract Development Manufacturing Organisation (CDMO) dedicated to providing services in the research, design, development, and manufacture of recombinant lentiviral (rLV) and recombinant adeno-associated viral (rAAV) viral vectors for advanced therapeutic applications.

Located in Sydney's Westmead Health and Innovation precinct, VVMF partners with researchers, clinicians and bio-pharma companies to accelerate the path to market for cell and gene therapies to local patients.

Viral vectors play a crucial role in delivering genetic material into cells and are central to innovative treatments in areas of medicine including cancers and rare diseases.
