

Issued: 2 February 2026

## Viral Vector Manufacturing Facility (VVMF) at Advanced Therapies Week 2026, San Diego

**Viral Vector Manufacturing Facility Pty Ltd (VVMF)** announces its participation at **Advanced Therapies Week 2026**, 9 – 12 February 2026, in San Diego, USA.

**VVMF Head of Business Development and Partnerships, Anita van der Meer**, will be available to discuss VVMF's expertise in process development, viral vector manufacturing, and the wrap-around services to leverage the advantages of the Australian biotechnology ecosystem.

Committed to supporting biotech and pharmaceutical companies, VVMF delivers high-quality lentiviral (rLV) and adeno-associated viral (rAAV) vector solutions tailored to their research, clinical, and commercial needs.

Backed by leading scientific and clinical expertise, VVMF provides a strategic advantage - further strengthened by Australia's 43.5% R&D tax incentive for eligible companies.

VVMF's **Anita van der Meer** shared, "The Advanced Therapies Week event is built around today's industry challenges. It's a great opportunity to connect and build new relationships within the global Cell & Gene therapy sector. I look forward to discussing how VVMF can be your trusted partner in advancing cell and gene therapies."

Schedule a meeting via the **ATW - Phacilitate Event App** or [info@vvmf.com.au](mailto:info@vvmf.com.au)

Unlocking the future of medicine – with strong connections built at Advanced Therapies Week 2026.

### About VVMF – Unlocking the Future of Medicine

Viral Vector Manufacturing Facility Pty. Ltd. (VVMF) is Australia's only Contract Development and Manufacturing Organisation (CDMO) dedicated to providing services in the research, design, development, and manufacture of viral vectors for advanced therapeutic applications. VVMF partners with researchers, clinicians, and bio-pharma companies to accelerate the path to market for cell and gene therapies to local and global patients.

Viral vectors play a crucial role in delivering genetic material into cells and are central to innovative treatments in areas of medicine including cancers and rare diseases.
